

“Simple Inventory Manager”

Problem Statement

A small shop is struggling to track its products.

They currently write everything in notebooks, which leads to:

- Missing products
- Wrong stock quantities
- Difficulty updating prices

They need a simple web system to:

- Add new products
- View all products
- Update product details
- Delete products

Each product should have:

- Product Name
- Category
- Price
- Quantity in Stock
- Date Added

Instructions (Step-by-steps)

◆ Step 1: Setup Project

- Create project folder: inventory-system
- Setup PHP environment (XAMPP/WAMP)
- Create database: inventory_db

◆ Step 2: Create Database Table

Create table products:

id (INT, AUTO_INCREMENT, PRIMARY KEY)

name (VARCHAR)

category (VARCHAR)

price (DECIMAL)

quantity (INT)

created_at (TIMESTAMP)

◆ Step 3: Database Connection

Create:

config/db.php

- Connect to MySQL using mysqli or PDO
-

◆ Step 4: Add Product (CREATE)

Create:

add_product.php

Requirements:

- Bootstrap form with:
 - Name
 - Category
 - Price
 - Quantity
 - Submit → Insert into database
-

◆ Step 5: View Products (READ)

Create:

index.php

Requirements:

- Display all products in a Bootstrap table

Columns:

- Name
 - Category
 - Price
 - Quantity
 - Actions (Edit / Delete)
-

◆ Step 6: Edit Product (UPDATE)

Create:

edit_product.php

Requirements:

- Load product data into form
 - Update values
 - Save changes
-

◆ Step 7: Delete Product (DELETE)

Add delete button in index.php

Requirements:

- Confirmation alert
 - Remove product from database
-

◆ Step 8: UI (Bootstrap)

- Add:
 - Navbar

- “Add Product” button
- Clean layout using container/cards

◆ Step 9: Extra (Optional Bonus)

- Show “Out of Stock” when quantity = 0
- Highlight low stock (e.g., quantity < 5)
- Add simple search by product name
- Format price nicely

Expected Folder Structure

```
inventory-system/  
|  
├── config/  
|   └── db.php  
|  
├── index.php  
├── add_product.php  
├── edit_product.php  
└── delete.php (optional)  
|  
└── assets/
```
